Pressure & Vacuum Testers

Technics presents an economical means to upgrade your manual burst test stands to meet new requirements for ramping and cycling. This highly adaptable package provides for simple integration into virtually any test stand.

- Ramp & Hold Profiling
- Sinusoidal Cycling
- Square Wave Cycling
- Pressure/Vacuum Cycling
- Ramp to Burst

Features:

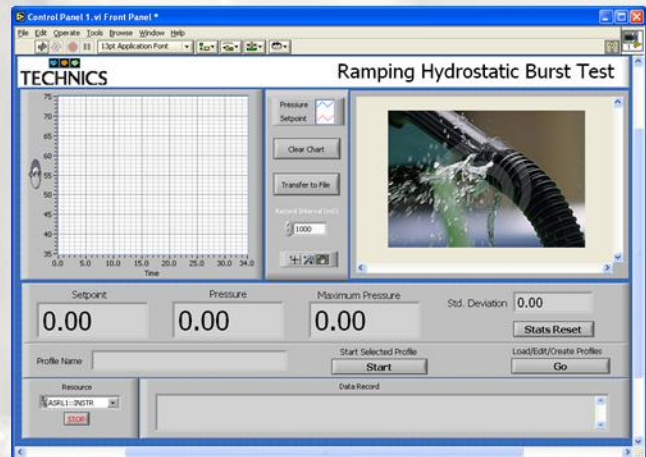

- Ramp better than 0.2% linearity
- Ramp rates as fast as 2 seconds to full scale.
- Cycling frequencies to 10 Hz
- Sinusoidal or square wave cycling
- Servo-controlled hydraulic systems
- Air Powered Systems

- Optional Camera Capture
- 40 GB storage
- Ethernet & Serial Communications
- External Mouse/Keyboard/Monitor ready
- Web Server Ready
- Integrates to external applications such as Excel, Microsoft Access, Oracle, & SAP
